FOR MORE INFO

UNIVERSAL BIOACTIVE NANO-HYBRID COMPOSITE RESIN

Designed for clinicians who prefer a non-sticky, easy to adapt composite with a smooth consistency that offers ...

- **Colour Stability & Easy Shade Match** for life-like aesthetics
- **Strong and Durable** for predictable clinical performance
- **Bioactive Properties** for prevention of secondary caries

The patented bioactive S-PRG filler technology with a unique combination of six beneficial ions helps provide bioactive properties, while maintaining aesthetics, physical, mechanical and optical properties of direct resins.

Simplified shade line-up helps to minimize inventory while achieving the desired aesthetic outcomes.

Available in 14 Shades – 4.5gm syringe

- Universal Dentin – A1, A2, A3, A3.5, A4, B1, B2, B3, C2, C3
- Opaque Dentin – A20, A30
- Enamel – INC, Bleach White - BW

CLINICAL APPLICATIONS

- Direct cosmetic tooth modifications, Diastema closure
- Class I – VI cavities & root caries
- Tooth wear – abrasion, erosion, attrition, abfraction
- Repair of fractured incisal edges
- Direct veneers and core build-up

FEATURES

- ✓ **True to nature aesthetics**
 - 3 different opacities with natural opalescence
 - Blends well even with a single shade
 - Shade stability before and after cure
- ✓ **Protect against secondary caries**
 - Minimize plaque formation
 - Neutralize the sugar acids
 - Reduce cariogenic bacteria
- ✓ **Superior handling**
 - Non-sticky, non-tacky and smooth consistency
 - Easy to adapt and place
- ✓ **Long lasting restorations**
 - Remarkable wear resistance
 - Clinically proven performance with 8 and 13 year clinical trials

PROPERTIES

- Flexural Strength: 130 Mpa
- Wear Resistance: 0.52 wt%
- Filler Load: 83 wt%
