

PRODUCT CATALOG 2015

2015 Product Catalog

It is once again a privilege to bring to you our newest catalog. For over 25 years Dentonics, Inc. has been producing and marketing dental products of the highest quality and most competitive pricing to bring to our worldwide network of dental professionals the utmost value.

Our Master-Dent® line of products is now distributed to over 75 countries and continues to expand with the utilization of our newest facility and personnel in England.

This has allowed us to establish and maintain our commitment to excellence in customer service, research and development, personnel, product quality and overall depth of our dental materials.

In addition to our Master-Dent® line we also produce materials on a private label basis for many of the largest dental dealers and manufacturers in the world.

Our integrated structure is designed to ensure that all work undertaken by the company is carried out to the complete satisfaction of our customers as well as the increasing regulatory requirements of CE, ISO 9001 and ISO 13485.

We will continue to add the necessary resources to maintain our highest degree of personal and efficient service while endeavoring to increase our customer base and range of products.

We look forward to working with you.

TEMPORARY CROWN & BRIDGE MATERIAL

Automix Cartridge System

Master-Dent® Automix Temporary Crown & Bridge Material is a quick and easy-to-use automix system that prevents cross contamination. Low brittleness, strong when bending/removing, so it will not break. With no oxygen inhibition layer, wiping residual layer is not needed. Less exothermic reaction eliminates heat sensitivity. No need to polish with this smooth finish!

TOPICAL ANESTHETIC

Master-Dent® Topical Anesthetic is a rapid-acting, long-lasting gel with no systemic absorption. The benzocaine provides temporary relief of pain and discomfort during procedures, including local anesthetic injections, periodontal curettage, impression taking, scaling, intra-oral radiographs, root planing and prophylaxis. The gel comforts patients with ulcers, wounds or other minor mouth irritations. Master-Dent® Topical Anesthetic has no bitter aftertaste and is now available in four great-tasting flavors.

REF	
47-149	Bubble Gum, 1Oz. (30ml)
47-150	Mint, 1 Oz. (30ml)
47-151	Cherry, 1 Oz. (30ml)
47-152	Strawberry, 1 Oz. (30ml)

ULTIMATE™ BOND

Light Cure Adhesive, One Component

Master-Dent® Ultimate™ Bond creates a chemical bond between dentin/enamel and all restorative materials. A single, light cured component that does not require mixing. Easy to use. Microleakage is minimized. Secondary caries are reduced. Excellent compatibility. Relieves hypersensitivity. Provides root surface desensitization. Combines mono and polymethacrylate resins with HEMA (hydroxyethylmethacrylate) to produce desired hydrophilic properties.

REF	
19-215	7ml Bottle

ULTIMATE™ SE BOND

LC Self Etching Adhesive, One Component (Etch-Prime-Bond)

Master-Dent® Ultimate™ SE Bond is a one bottle, light cured, self etching bonding agent that features ease of use and highly durable bonds with reduced procedure times as well as optimal desensitization. Boasting a shear bond strength of 37MPa to dentin and enamel, **Master-Dent® Ultimate™ SE Bond** is compatible with all light cured composites, compomers and cements and is indicated for Class I, III, IV, V and VI restorations as well as composite repairs. Ideal for root surface desensitization and for pediatric procedures that require reduced treatment time.

REF	
19-280	5ml Bottle

COPAL VARNISH

Master-Dent® Copal Varnish insulates against thermal and electric shock. It provides a strong bond between dentin and restoration. A chloroform free formula of varnish and solvent.

REF	
11-300	Copal Varnish 15ml
11-301	Solvent 15ml
11-302	15ml Varnish & 15ml Solvent

DENTIN SEALANT

Master-Dent® Dentin Sealant is a unique formula that can be used under composite, amalgam and cast restorations. Covers and protects dentinal tissue from harmful irritants by creating a chemical and physical barrier. Guards against patient discomfort and secondary decay.

REF	
12-200	15ml Bottle

DESENSITIZER

Master-Dent® Desensitizer is a fast and effective way of sealing dentinal tubules. The material provides fast relief from pain caused by hypersensitivity and is formulated with Benzalkonium chloride to inhibit bacterial growth.

REF	
13-670	7g Bottle

GLASS IONOMER LINER/BASE

Master-Dent® Glass Ionomer Liner chemically bonds to dentin and can be acid etched along with the surrounding enamel to accept an esthetic overlay of composite. Protects the tooth from harsh monomers to help prevent sensitivity. This fluoride releasing base is beneficial under every composite restoration. It flows easily to cover all dentin and sets quickly after placement.

REF

11-000

15g Powder & 15ml Liquid

GLASS IONOMER LIGHT CURE RESIN REINFORCED LINER

Master-Dent® Glass Ionomer Light Cure Resin Reinforced Liner is a liner/base material, recommended for use under composite, amalgam, metal and ceramic restorations. It is not indicated for direct pulp capping. The liner is radiopaque, contains fluoride and the light cure feature offers faster, command setting.

REF

11-050

15g Powder / 7ml Liquid

GLASS IONOMER LUTING CEMENT

Master-Dent® Glass Ionomer Luting Cement is an impressive caries-preventive cement that chemically bonds to dentin and helps to prevent breakdown or loss of enamel. Primarily a permanent cementing agent for conventional dental prostheses, it is also an orthodontic band cement, coronal buildup material, and a cavity liner. Diametral Tensile Strength is above 9.5 MPa. Releases fluoride.

REF

100g Powder & 60ml Liquid

GLASS IONOMER DUAL CURE RESIN REINFORCED LUTING CEMENT

Master-Dent® Glass Ionomer Dual Cure Resin Reinforced Luting Cement is a dual cure radiopaque, high strength resin-reinforced luting cement with sustained fluoride release. It is designed for final cementation of metal, porcelain-fused-to-metal, metal-free crowns, bridges, inlays and onlays. It bonds chemically and mechanically to tooth structure and all types of core material.

REF

10-440

15g Powder / 7ml Liquid

LIGHT CURE CAVITY LINER

Calcium Hydroxide Liner

Master-Dent® Light Cure Cavity Liner has a light paste consistency to facilitate application. This biocompatible resin, filled with hydroxyapatite and barium sulfate, protects the pulp and dentin from acid-containing cements and restoratives.

REF	
11-200	8g Syringe
11-254	4 x 1.5g Syringes w/ Tips

POLYCARBOXYLATE CEMENT

Master-Dent® Polycarboxylate Cement is used primarily for final cementation of crowns and bridges. This luting cement has good biocompatibility, low film thickness of 13-18 microns and good insulating characteristics. It's the material of choice for sensitive teeth and for preparations close to the pulp.

REF	
10-200	25g Powder & 15ml Liquid
10-300	60g Powder & 40g Liquid
10-304	80g Powder & 40g Liquid

RESIN CEMENT

Master-Dent® Resin Cement is a reinforced, self-curing, multi-purpose permanent cement. It can be used for final cementation of bridges, crowns, veneers, implant prostheses, pins, posts and Maryland bridges. A resin-based luting agent for effective cementation now also packaged in automix syringes.

REF	
10-800	4g Catalyst Syringe, 4g Base Syringe, Spatulas & Mixing Pad
10-820	7ml Automix Syringe w/ Tips
10-828	Blue Mixing Tips 50/bag

TEMPORARY CEMENT

With Eugenol (ZOE), Non-Eugenol (NE), Non-Eugenol Extra Strength (XS)

Master-Dent® Temporary Cements are mild zinc oxide based temporary crown and bridge cements, that offer good retention of the temporary prosthesis and yet making it easy to remove. There is good marginal seal which minimizes sensitivity. Temporary Cement (NE) and Temporary Cement (XS), are both without eugenol and are therefore compatible with provisional resin restorations, resin core materials, permanent cements and adhesives. Temporary Cement (XS) offers a stronger alternative (69MPa compared to 49MPa with NE and ZOE formulations) in cases where extended service time is indicated, such as with implants.

REF	
10-928	With Eugenol (ZOE) 7ml Automix Syringe w/tips
10-922	Non-Eugenol (NE) 7ml Automix Syringe w/tips
10-920	Non-Eugenol Extra Strength 5g Syr Part A, 5g syringe Part B, Spatulas, Mixing Pad
10-932	Non-Eugenol Extra Strength (XS) 7ml Automix Syringe w/tips
10-827	Brown Mixing Tips 50/bag

ZINC OXIDE EUGENOL CEMENT (ZOE)

Master-Dent® Zinc Oxide Eugenol Cement (ZOE) has a non-irritating formulation for the temporary cementation of crowns and bridges. It mixes easily to a smooth consistency. Strong adhesion and easy removal.

REF

10-900	21g Powder & 7.5ml Liquid
--------	---------------------------

ZINC OXIDE EUGENOL (REINFORCED) Intermediate Restorative Material (with Fiber)

Master-Dent® Zinc Oxide Eugenol Reinforced Material (with fiber) has a sedative effect on the pulp and is especially useful for cementation on prepared teeth with exposed dentinal tubules. The addition of polymers as reinforcing agents have transformed it into a final cement and intermediate restorative material with a compressive strength of 37 MPa. Offers excellent adhesion and easy removal.

REF

10-910	50g Powder & 15ml Liquid
--------	--------------------------

ZINC PHOSPHATE CEMENT

Master-Dent® Zinc Phosphate Cement is a very high strength permanent cement (131 MPa Compressive Strength) representing, perhaps, the most established and most well accustomed cement still in use. It also provides a good insulating layer against thermal shock.

REF

10-000	32g Powder & 17.5ml Liquid
10-058	80g Powder & 55g Liquid

CHEMICAL CURE COMPOSITE

Master-Dent® Chemical Cure Composite is a resin based two-paste system for restoring fractured anteriors, anterior cavities, pits and fissures in pre-molars and gingival erosion. With its high compressive strength and low water sorption, it offers outstanding esthetic and optical properties, creating a smooth consistency and natural appearance.

REF

14-250	7g Catalyst Paste, 7g Base Paste, Spatulas & Mixing Pads
14-275	same as #14-250 plus 3ml Base Resin, 3ml Catalyst Resin, 3ml Etch

14-400	same as #14-300 plus 3ml Base Resin, 3ml Catalyst Resin, 7ml Etch

MASTER-FLOW™ Flowable Composite

Master-Dent® Flow Composite is a light cured flowable hybrid resin restorative recommended for Class III, Class IV and Class V restorations, combining the Bis-GMA chemistry with a non-slumping flowability for easier placement and contouring. Flows into the preparation versus traditional packing and manipulation. Dispensed through a syringe with an application tip for increased accuracy and fingertip control.

Master-Fil™ MICRO Microhybrid Light Cure Universal Composite

Master-Fil MICRO™ combines Bis-GMA resin technology with advanced curing components and glass fillers to achieve both excellent esthetics for perfectly matched anteriors and superior abrasion resistance for successful posterior restorations. The composite is condensable and adapts well to the cavity, sculpts superb anatomy without sticking to the instrument and does not slump.

MASTER-FIL™ NANO

Nanohybrid Light Cure Universal Composite

Master-Fil NANO is a nanohybrid light cure composite containing a state-of-the-art nano-filler system. It is indicated for direct esthetic restoration of anterior and posterior teeth and can be used in all classes of direct dental restorations, Class I, II, III, IV and V. Its high viscosity prevents the material sticking to hand instruments, yet offers sufficient flow to adapt to the walls of the cavity preparation. Master-Fil NANO is radiopaque and combines high compressive and flexural strengths with low water uptake.

GLASS IONOMER RESTORATIVE

Master-Dent® Glass Ionomer Restorative is a self-cured glass ionomer restorative featuring high tear and bond strength for a durable restoration; easy mixing and good handling properties for reduced procedure time; excellent translucency for superior esthetics. It is radiopaque and features fluoride release. Available in A2 and A3 shades.

REF		
15-421	15g Powder & 10ml Liquid	Shade A2

GLASS IONOMER LIGHT CURE RESIN REINFORCED RESTORATIVE

Master-Dent® Glass Ionomer Light Cure Resin Reinforced Restorative is indicated for deciduous cavity restoration, Class V / cervical lesions and small single surface class I or II cavities in adult teeth; Glass ionomer/composite “sandwich” restorations; ART or minimally invasive procedures; or situations where cariostatic activity is required.

REF	
15-500	15g Powder / 7ml Liquid

GLASS IONOMER POSTERIOR RESTORATIVE Packable

Master-Dent® Glass Ionomer Posterior Restorative is a high strength, radiopaque, all-purpose direct esthetic glass ionomer filling material. It has been developed for minimum intervention dentistry and is ideal for posterior use where esthetics is an important factor. It is indicated for Class I and II as well as Class I, II, III and V in pediatric cases.

CORE BUILD-UP (PASTE-PASTE)

Master-Dent® Core Build-up is a self cure product designed for core build-ups and cementation of posts and pins. Creamy smooth formulation, radiopaque and non-slumping. Exclusive matched-viscosity pastes ensure easy, reliable mixing even if proportions are varied to adjust setting time. Sets hard in minutes so finishing can take place without delay. High compressive strength with easy application.

CALCIUM HYDROXIDE PASTE

With Barium Sulfate, Root Canal Filling Material

Master-Dent® Calcium Hydroxide Paste with Barium Sulfate provides the full benefits of calcium hydroxide in root canal therapy. It is used as a root canal sealer for the temporary filling of root canals after conventional endodontic treatment between office visits to disinfect the canal. It is also indicated for direct pulp capping, pulpotomy, pulpectomy, cavity lining and indirect pulp caps to stimulate dentin bridging. Water soluble for easy removal, it has an excellent antibacterial effect. Barium Sulfate provides high radiopacity. This material has a high pH (>12.0) and its convenient premixed syringe with disposable tips makes delivery and application simple.

REF	
11-280	4 x 1g Syringes w/ Tips

CALCIUM HYDROXIDE POWDER

Master-Dent® Calcium Hydroxide Powder is ideal for those who prefer to formulate their own direct and indirect pulp capping paste or sub-bases for use under restorations.

REF	
11-276	1 Lb. (454g)

EDTA SOLUTION, 17%

Master-Dent® EDTA Solution irrigates root canals. Also assists in softening root canal walls for ease of instrumentation.

REF	
12-750	2 oz. bottle (60ml)
12-800	8 oz. bottle (240ml)

EUGENOL USP GRADE

Master-Dent® USP Grade Eugenol is both antiseptic and analgesic. Ideal for those who prefer formulating their own temporary cements by mixing this with zinc oxide powder. Also used as an antiseptic in root canal therapy.

REF	
12-651	1 oz. (30ml)
12-655	4 oz. (120ml)

FORMO-CRESOL

Master-Dent® Formo-Cresol is used primarily for the treatment of putrescent or necrotic pulps as well as a temporary medicament during root canal therapy.

REF	
12-660	1 oz. (30ml) bottle
12-662	1/3 oz. (10ml) bottle

MTA ROOT TREATMENT & VITAL PULP THERAPY

Master-Dent® MTA is a superior root repair material, used for retreatment of perforations during root canal therapy, as an apical plug during apexification, treatment of internal resorption and root end filling. It may also be used for pulp-capping, pulpotomy or as a base or liner. Hydration of the fine powder particles forms an impermeable barrier once fully set. The unique **Master-Dent MTA Gel** resists washout and offers increased stability compared to similar materials.

REF	
12-900	MTA Root & Pulp Treatment Material (2g kit)

- Unique Powder/Gel format improves resistance to washout
- Finer powder for faster hydration
- Improved Radiopacity
- Biocompatible
- Strong Sealing Properties
- Desiccant-lined jar protects from humidity

N-METHASONE

Permanent Root Canal Filling Material Radiopaque

Master-Dent® N-Methasone is a radiopaque material for permanent root-canal filling. Its composition provides antiseptic and anti-inflammatory properties to reduce post-operative trauma. The conventional powder and liquid formula allows the clinician to adjust the viscosity of the material according to the obturation technique. Before the paste hardens, it penetrates the narrowest fissures and maintains its therapeutic effects throughout the treatment until completely set. After final obturation, N-Methasone neither retracts nor resorbs.

REF	
12-685	14g powder & 10ml liquid

RC LUBE

Master-Dent® RC Lube used for preparation of root canals, provides lubrication, rapid cleansing and deeper penetration of root canal medicaments.

REF	
49-002	2 x 12g Syringe, boxed
49-004	5 x 3cc Syringe, w/ 50 tips
49-018	18g Jar
49-227	227g Jar

ROOT CANAL SEALER / CEMENT

Master-Dent® Root Canal Sealer/Cement is a radiopaque powder and liquid sealer containing eugenol.

REF	
12-675	40g powder & 15ml liquid

TEMPORARY FILLING MATERIAL Saliva Cured

Master-Dent® Temporary Filling Material is a ready to use material that does not have to be mixed. It hardens rapidly in the cavity in the presence of saliva. It is a safe material with excellent stability in the mouth providing a hermetic sealing of the cavity margins. Good strength yet easily removed.

REF	
11-402	38g Jar
11-405	28g Jar

TEMPORARY FILLING MATERIAL Light Cured

Master-Dent® Light Cured Temporary Filling Material offers more reliable performance due to its higher wear resistance, increased mechanical strength and better resistance to oral fluids. Substantially longer service time when compared to saliva-cured filling material. Less technique sensitive. Provides predictable and reproducible results. Fast application and deep cure. Patient does not have to wait before being allowed to eat. Good strength yet easily removed. Universal (A2) shade.

REF	
11-500	4g Syringe

ZINC OXIDE POWDER USP GRADE

Master-Dent® USP Grade Zinc Oxide Powder can be used to formulate temporary filling materials, cements and root canal sealers. ZOE bases are compatible with hard and soft tissue and have a local anesthetic effect.

REF

12-700	1 Lb. (454g) Can
--------	------------------

BLUE GEL ETCH

Master-Dent® Blue Gel Etch offers 37% phosphoric acid gel in various packaging options. Vivid blue for visual confirmation of application and rinsing. Luer lock tips are angled for easy access, offering better control.

REF

18-120	12g luer lock syringe w/ 10 blue luer lock needle tips & 10 black luer lock needle tips
18-125	4 x 1.2ml syringes w/ 20 blue luer lock needle tips
18-130	60g syringe, 5 empty 3ml syringes, 20 blue luer lock needle tips

ACCESSORIES

11-258	Blue Luer lock needle tip (20 pkg)
11-259	Blue Luer lock needle tip (100 pkg)
18-106	Empty 3ml syringes (50 per pkg)

GREEN GEL ETCH

Master-Dent® Green Gel Etch offers a sophisticated 37% phosphoric acid formulation containing wetting agents, easily soluble thickeners and FDA certified dye. It is easy to apply and to control etched areas, as well as easy to rinse off. Dispensing system is precise and simple, thus preventing the possibility of contamination and waste. The economy size 12 gram package is priced to allow substantial savings and the 60 gram saves even more.

REF

18-100	12g Syringe with clear straight plastic tips
18-199	Straight plastic tips for 18-100 (50pkg)
18-200	Angled plastic tips for 18-100 (50pkg)
18-114	12g Syringe (luer-lock) with 20 blue luer-lock tips
18-105	60g Syringe, 5 empty 3ml syringes, 20 black luer lock needle tips

LIQUID & VISCOUS ETCH

Master-Dent® LIQUID Etch is a phosphoric acid solution of 37% with a viscosity similar to water. It is used to make enamel and dentin susceptible to bonding. It properly conditions the tooth to enhance adhesion and mechanical retention. Multiple bottle sizes to fit every need.

Master-Dent® VISCOUS Etch is thicker than liquid etch, but thinner than gel etch. It dispenses easily from the bottle and is of medium viscosity so it will not run.

REF

DIAMOND POLISHING PASTE

Master-Dent® Diamond Polishing Paste is ideal for polishing composites, amalgam and castings and represents an ultimate solution for restoring original smoothness to dental ceramics after making repairs, adjustments, etc. Designed for both intra- and extra-oral use, this product is based on high purity, non-toxic ingredients. A polyglycol base of controlled molecular weight prevents splattering and facilitates wash-out without staining the tissue. The abrasive consists of pure diamond powder, whose particle size has been selected for best efficiency and optimum gloss. The best way to apply the paste is with felt polishing accessories.

REF	
32-500	3g Syringe

POLISHING PASTE (NON-DIAMOND)

Master-Dent® Polishing Paste is ideal for polishing composite restoratives, amalgams and castings. This carborundum-based material will not dry out or change in consistency. Cohesive and non-splattering; will stay where it is placed. Totally water soluble. Easily washes off teeth; cleans up and rinses off completely.

REF	
32-510	5g Syringe

ALGINATE PLUS

Master-Dent® Alginate Plus is a new superior formulation with more algin for increased tear strength, creamier and smoother impressions and more accurate models. Fresh mint flavor.

REF

VINYL POLYSILOXANE (VPS) IMPRESSION MATERIAL

50ml (1:1) and 380ml (5:1) Cartridges

Master-Dent® VPS Impression Material integrates superior dimensional stability, tear resistance and accuracy with ease of handling for consistently accurate impressions. Offered in a wide variety of formulations and delivery systems, its super-hydrophilic nature is formulated to ensure excellent final impressions with minimal distortion and great dimensional stability. The material will not drip, sag or slump during extrusion. Now available in our new jumbo 380ml cartridge system which stores the base and catalyst components separately in a specific 5:1 volumetric ratio.

AUTOCLAVE CLEANER

Master-Dent® Autoclave Cleaner is an ultra-high performance, powdered, autoclave chamber cleaner. 3 cap measures make 1 cleaning. Highly effective at removing hard water scale from reservoir, chamber and tubing.

REF	
41-160	1 Lb. (454g)

ULTRASONIC CLEANER & EVACUATION CLEANER LIQUID (CONCENTRATE)

Master-Dent® Cleaners provide a unique formulation of a non-foaming, multi-enzyme concentrate containing 4 enzymes (non-animal type) for effective cleaning and powerful performance. Dissolve bacteria-laden solid debris like organic tissue, coagulated blood, saliva, prophy paste or impression material. Its many uses are as an ultrasonic cleaner, an evacuation system cleaner, and instrument presoak/cleaner, a sink trap cleaner and a fabric stain remover. Biodegradable, anti-pollutant, noncorrosive and nontoxic. Maintains cleanliness safely and inexpensively. Easy measure bottle.

REF	
41-150	Ultrasonic Cleaner concentrate. Quart (0.95 liter) makes 32 gallons (121 liters)
41-151	Evacuation Cleaner concentrate. Quart (0.95 liter) makes 32 gallons (121 liters)

ULTRASONIC ENZYMATIC CLEANING POWDER

Master-Dent® Ultrasonic Cleaning Powder, a non-toxic cleaner, dissolves, releases and cleans away blood, tissue and mucus matter. The pre-measured single packet makes cleaning simple. Add one packet per gallon (3.8 liters) of water.

REF	
41-157	20 packets per box makes, 20 gallons (76 liters)

LIGHT CURE ORTHODONTIC ADHESIVE

Master-Dent® Light Cure Orthodontic Adhesive represents a state-of-the-art technology, offering the most desirable characteristics, from the point of view of versatility, ease of handling, aesthetics and reliability. High light sensitivity of the material allows for the use of the adhesive, not only for bonding the translucent (plastic or ceramic) brackets, but also, light impermeable metal ones. Simple procedure, relief from pressure, results in reproducible bonding strength and allows for precise bracket placement.

REF

27-200

5g syringe Paste, 3g Primer, 6ml Etch, Brushes, Spatula

NO-MIX BRACKET ADHESIVE KIT

Master-Dent® No-Mix Orthodontic Bracket Adhesive Kit gives the operator the convenience and security of virtually unlimited working time. This no-mix system reduces the possibility of errors and eliminates the sources of inconsistencies found in the performance of common self-cure adhesives. The application is extremely simple and fast, resulting in substantial chair-time savings. Delayed cure permits the operator to correct the positions of the brackets up to 20 seconds after placement. Only 4 minutes after placement the brackets are ready for wire attachment.

REF

27-500

 5g syringe Paste, 6g Primer, 6ml Etch,
Brushes, Brush Holder, Spatula

ORTHODONTIC PRIMERS

Master-Dent® specialty Primers create a strong bond for attachment of orthodontic brackets. Used in addition to Orthodontic Adhesive Primers

ACIDULATED PHOSPHATE FLUORIDE (APF) GEL

Master-Dent® APF Gel is a 60-second, acidulated phosphate fluoride that contains 1.23% fluoride ion. The thixotropic gel flows easily onto the tray, yet minimizes risk of ingestion, maximizes contact with all tooth surfaces. The low pH ensures maximum fluoride uptake in 60-seconds. New flavors offer a pleasant taste with no bitter aftertaste.

REF

39-300	APF Gel Cherry (16oz./475ml)
39-310	APF Gel Bubblegum (16oz./475ml)
39-320	APF Gel Strawberry (16oz./475ml)
39-330	APF Gel Mint (16oz./475ml)

2% NEUTRAL SODIUM FLUORIDE GEL

Master-Dent® 2% Neutral Sodium Fluoride Gel is a non-acidic treatment for patients with cosmetic and porcelain restorations as well as those with tooth sensitivity or patients suffering from root caries. Due to its neutral pH, the gel is compatible with composite and porcelain restorations. The special antimicrobial and flavor retention formulation delivers excellent patient acceptance. It flows easily during placement and has a 4 minute application time. Gluten free.

SYNERGY™

Master-Dent® SYNERGY™ is a patented dual-component system that represents the most advanced science in tooth whitening today. With a 30-minute bleaching duration, Synergy™ gives superior results compared to whiteners that take up to 2 hours. The unique formulation combines 30% Carbamide Peroxide with 15% Calcium Peroxide (equivalent to a 25% Carbamide Peroxide product) to deliver rapid but safe whitening results. The unique feature of this state-of-the-art whitener is that the “synergy” of the two components not only releases free calcium to support re-mineralization and rejuvenate enamel lustre - but its water release feature prevents the sensitivity often associated with single component whiteners.

REF	
SYNERGY IN OFFICE PATIENT KIT	
30-160	4 X 6.6g syringes plus tips, 3 EVA sheets, storage case
SYNERGY REFILL SYRINGE

30-160-36	36 x 6.6g syringes plus tips, 36 sets patient instructions

VIVACITY™ TOOTH WHITENING

Master-Dent® Vivacity™ Tooth Whitening offers sustained release of carbamide peroxide. This sticky gel has been formulated to an optimum viscosity, so that it does not escape from the tray during placement or during the whitening process. The gentle and safe formulation acts fast and effectively but avoids the high sensitivity associated with many “me-too” bleaching products. Vivacity™ has a fresh pleasant peppermint taste.

REF	
10% CARBAMIDE PEROXIDE	
30-181	4 x 3ml syringes, 30 ml rinse
30-184	12g syringe

<i>ORDERING</i>	All orders are subject to final acceptance by Dentonics and are subject to our terms of sale. Minimum order \$100 (U.S. Customers) and \$500 (International Customers)
<i>CUSTOMER LIABILITY</i>	All merchandise is tested and inspected before packaging and all shipments leave our factory in good condition. Protect your interest by refusing to accept damaged shipments until the driver has inspected the damage and recorded a description of it on the bill of lading. Obtain his signature with this done.
<i>RETURNS</i>	Returned merchandise will not be accepted without prior authorization from Dentonics. Requests to return merchandise, as a customer accommodation, must be received within 45 days of shipment and will be subject to a 20% restocking charge. Note: We reserve the right to refuse any merchandise for credit. Any merchandise received by Dentonics without prior authorization shall not receive credit.
